OBJECTIVE

CVM Analyst at Vodafone Oman with a Computer Science background, seeking a Developer role in the banking sector. I have excellent programming skills, keep up to date with new technologies and software, and have a strong ability to learn quickly and pick up new skills and tools.

In my current role, I use SQL, Python, Power BI, and Excel to analyze data, build segmentation logic, automate repetitive tasks, validate data accuracy, and investigate data and system issues, working closely with IT and business teams.

I am currently pursuing an MBA at Majan University College and an Advanced Professional Certificate in Leadership and Management with the London School of Business & Administration.

PROFESSIONAL EXPERIENCE

CVM Analyst — Vodafone Oman

May 2024 – Present

- Analyze customer, campaign, and commercial performance data to identify trends, performance gaps, customer behavior patterns, and improvement opportunities.
- Monitor key performance indicators and develop analytical reports and dashboards using SQL, Power BI, and Excel to support business decision-making.
- Design customer segmentation logic and data-driven campaign workflows based on business requirements and customer behavior.
- Automate data extraction, segmentation, and reporting activities to reduce manual effort and improve operational efficiency.
- Perform data validation and quality checks to identify inconsistencies and support accurate campaign execution and reporting.
- Investigate data, system, and campaign execution issues, identify potential root causes, and coordinate with relevant teams to support resolution.
- Collaborate with IT, Operations, Sales, and other cross-functional stakeholders on campaign execution, system requirements, operational issues, and process improvements.
- Track campaign performance and customer responses and provide analytical insights to support retention, customer value, and commercial performance initiatives.

CORE STRENGTHS

- Fast learner of new skills & tools
- Keeps up with new technologies
- Problem solving & troubleshooting
- Requirement analysis
- Accuracy & attention to detail
- Cross-functional collaboration
